About ZBS International:

ZBS International is a trusted name in the field of Immigration Advisory and Educational Consultancy with over 22 Years of successful legacy. We provide reliable and experienced guidance for study, visit visas, specialized training visits, work placements, immigration, and business settlement opportunities, especially for United Kingdom and European Countries. We are now offering our services for our valued clients seeking specialized short training for **Nurses, Physical Therapists** and professionals from **Allied Health Sciences** in the United Kingdom.

Key Facts of this Training:

- Academic Level: Advance / Pro
- Duration: 7-8 Days
- Location: London & Liverpool
- Starting Month: • January, 2026
• March, 2026

About the Course:

This intensive programme is designed for **physical therapists and healthcare professionals** seeking to upgrade their skills to the UK standards and prepare them for the **Health & Care Professions Council (HCPC) UK** Registration pathways, in order to get themselves registered in the UK, enabling them to practice.

The course combines **theory, practical workshops, and clinical simulations** across musculoskeletal, neurological, and cardiorespiratory physiotherapy, while introducing advanced therapies such as hydrotherapy, electrotherapy, acupuncture, chiropractice techniques, and occupational rehabilitation.

Who Should Attend?

This course is ideal for:

- International physical therapists aiming to align with UK practice standards.
- Healthcare professionals seeking advanced training in rehabilitation.
- Candidates preparing for HCPC registration and practice in the UK.

Key Highlights:

- 7 days of immersive training with expert-led sessions.
- Covers Musculoskeletal, Neurological, and Cardiorespiratory physiotherapy.
- Hands-on workshops in hydrotherapy, electrotherapy, and acupuncture.
- Includes occupational rehabilitation and chronic pain management.
- Focus on UK healthcare standards, ethics, and HCPC readiness.
- Final clinical simulations and assessments with certification.

www.zbsinternational.com

Learning Outcomes

- Apply advanced clinical assessment and rehabilitation methods.
- Deliver evidence-based care across MSK, neuro, and respiratory physiotherapy.
- Integrate specialized therapies into patient treatment plans.
- Demonstrate competence in the UK professional, ethical, and legal frameworks.
- Work effectively in multidisciplinary healthcare teams
- International Exposure in a Diverse Environment

Certification

Upon successful completion, participants will be awarded the **'Advanced Certificate (Level-5) in Physical Therapy Practice & Rehabilitation Techniques'**. This certificate is aligned with UK professional standards and supports readiness for HCPC Registration.

(Please Note that the certification does not itself confer HCPC Registration, as it has to be done separately)
